

The background is a dark blue, semi-transparent overlay on a light blue background. It features a 3D rendering of a robot's head and hand on the left, with the hand holding a small object. The background is filled with various data visualizations, including a bar chart on the right, a line graph with a green line, and several circular and rectangular patterns that resemble circuit boards or data flow diagrams. The overall aesthetic is futuristic and technological.

AI IN ACTION: MY APPLIED PROJECTS & INDUSTRY INSIGHTS

Aima Ayaz

The background of the slide features a dark, blue-toned image. On the left, there is a silhouette of a person's head and shoulders, facing right. On the right, there is a stylized, glowing outline of a human head in profile, facing left. The background is filled with faint, glowing circuitry patterns and binary code (0s and 1s). In the center, the letters 'Ai' are visible in a large, semi-transparent font.

INTRODUCTION

AI student with hands-on experience in applied machine learning, deep learning, NLP, reinforcement learning, ethical AI analysis, and real-world case study research. Skilled in Python, ML workflows, model development, data analysis, and real-world AI applications across multiple industries.

KEY PROJECTS & LEARNINGS

AI Study Assistant

- Developed an intelligent study assistant using LLM workflows.
- Implemented features like chat history, memory, note-adding, summarization, and quiz generation.
- Focused on usability, modular design, and real-world application.

- **Link:**

https://github.com/AimaAyaz/AimaAyaz_Solo_ITAI2376.git

NASA Space Mission Classification (ML Project)

- Built a classification ML pipeline to classify NASA missions by type using real mission data.
- Implemented preprocessing, feature engineering, model training, and evaluation.

- **Link:**

https://github.com/AimaAyaz/FP_Aima_Ayaz_ITAI2372.git

KEY PROJECTS & LEARNINGS

AI Abuse Case Study (Synthesia Video)

- Investigated misuse of AI in an industry (e.g., deepfakes, surveillance, fraud).
- Focused on societal risks, accountability, and prevention strategies.

- Link: https://youtu.be/IO-2SdtEb_g

CNN Image Classifier — Puppy vs Bagel

- Built a custom CNN + transfer learning model to classify images with high accuracy.
- Link: <https://github.com/AimaAyaz/Aima-Ayaz-AI-Portfolio/tree/35f97729f6f75cabde836e58f184bbf651d58819/DeepLearning-ITAI2376/Projects/Lab03-CNN-PuppyOrBagel>

- Applying ML for diagnostics, fraud detection, predictive analytics, and automation.

- Designing ethical AI frameworks for fairness, transparency, and safety.

- Using AI to solve problems in healthcare, finance, manufacturing, public sector, and smart cities.

- Building data-driven solutions with Python, ML models, and research-based analysis.

REAL-WORLD APPLICATIONS (SKILLS)
